

EEE G547 Project Evaluation Scheme

Date - 28th April 2018

Venue - TP Classroom

Time - 4 to 7

Total Marks - 50

Demo	Documentation	Kernel Space Code	Firmware	Hardware	Extra
10	12	10	6	6	6

- Documentation includes the properly commented code on Github along with a readme file explaining about the project and how to compile and build the overall project. A sample documentation index is proposed below.
 - Project Title
 - Summary
 - Hardware Design (schematic and actual photograph)
 - Firmware and it's build process (To be adjusted for RPi projects in extra+HW)
 - Kernel Space Driver and it's build process
 - User space application (optional)
- For documentation, include a readme file on your repository. Documentation should be well written and easy to follow.
- Demo marks will be awarded for fully working demos and partial marks shall be awarded depending on the completion status.
- Extra marks will be awarded to extraordinary contributions and are purely a jurisdiction of instructor.
